Tiffany Soa Andria

atiff.soa@gmail.com | linkedin.com/in/tiffany-soa-andriamiharimanana/ | github.com/tiffsoa

Software engineering co-op student with three internships, including production Java/Spring Boot development at Intact Financial Corporation. Experienced leading 10-person Agile teams on two projects and owning testing and CI.

EDUCATION

Bachelor of Engineering, Software Engineering Co-Op — Jan. 2024 - Expected May 2028
Concordia University — *Montréal, QC*

- GPA: 3.5/4.3
- Relevant Courses: Data Structures & Algorithms, Software Architecture & Design, Software Testing & QA, Operating Systems

SKILLS

Languages: Java, TypeScript, JavaScript, Python, HTML/CSS
Frameworks: Spring Boot, React, React Native, Next.js, Tailwind CSS
Testing: JUnit 5, Playwright, Jest, Vitest, Mockito
Data & cloud: MongoDB, Power BI, Power Query
DevOps & tools: Git, GitHub Actions, Jenkins, Maven, Docker, SonarQube, Jira, Figma

EXPERIENCE

Software Developer I — Sept. 2026 - Dec. 2026
Intact Financial Corporation — *Montréal, QC*

- Shipped a feature-flagged business-rule change across 3 Java/Spring Boot services and 2 shared libraries that raised auto insurance coverage limits by up to 67%.
- Removed 5 obsolete feature toggles from production code, deleting ~200 lines of dead code and simplifying release logic.
- Built a shared eligibility module and automated upgrades for existing policies that were newly qualified under the new limits.

Referential Data Analyst Intern — Sept. 2025 - Dec. 2025
BNP Paribas CIB — *Montréal, QC*

- Automated monthly KPI reporting with Power BI and Power Query, replacing manual data entry with dynamic dashboards and saving the team 6 hours a month.
- Improved reporting accuracy for global referential systems by identifying and fixing data inconsistencies at the source.

Junior Functional Consultant — Jan. 2025 - May 2025
Vffice Inc. — *Saint-Hubert, QC*

- Resolved 45+ client support tickets on Microsoft Dynamics 365, turning system constraints into working configurations.
- Reduced system deployment errors by conducting rigorous functional testing and rapid prototyping within Microsoft Dynamics 365.
- Wrote client configuration documentation that became the team's reference for system setups.

PROJECTS

Team Lead & Developer - Handshake (Capstone) | *TypeScript, Nuxt, Nitro, PostgreSQL, Valibot, Vitest* Sept. 2026 - Present

- Lead a 10-person team building a B2B matchmaking backend for event platforms: facilitate weekly meetings, run iteration planning and backlog refinement, and write 200+ GitHub issues.
- Built the shared contracts package (TypeScript, Valibot) that defines every data shape once for the API and backoffice, with separate stored and public schemas that keep password hashes and API secrets out of responses.
- Added a shared request-body validation helper to the API and wrote valid and invalid test cases for every schema in Vitest.
- Reviewed 25 teammate pull requests (authentication, Omerlo API client, CI, deployment).

Team Lead & Developer - Campus Guide Mobile App | *React Native, TypeScript, Google Maps API* Jan. 2026 - Apr. 2026

- Led a 10-person Agile team for 4 months: ran sprint planning and weekly syncs, turned requirements into 100+ GitHub issues, set up PR and issue templates.
- Built the indoor floor-plan flow: moved hardcoded map data into modular per-building JSON files and gave floor plans their own screen with floor selection, using nested navigation.
- Added step-by-step navigation instructions and let users switch between walking, driving, transit and shuttle mid-route, recalculating the route without restarting navigation.

SUMMS - Micro Mobility Platform | *Next.js, TypeScript, MongoDB, Playwright* Feb. 2026 - Apr. 2026

- Designed the reservation engine with the Factory pattern for vehicle types and the Strategy pattern for payments, so new payment methods plug in without changing booking code.
- Built the user dashboard for finding vehicles and managing active bookings in real time.
- Owned testing: wrote integration and end-to-end tests with Jest and Playwright covering the login-to-booking flow.
